Coupon By Percent:

Displayed at the POS with the coupon name, as the cashier presses the button the discount applies:

You can apply to a specific item, or discount all the items.

Version 7 will also verify that the item is eligible to receive a coupon discount

Coupon by Dollar amount

Current		All Coupons		By Amount (\$)	
ID	\$ Off	\$ Min	Exp.		
▶ C1	50	1200	12/31/2099		
c100	100	2000	12/31/2099		
Goodo	500	10000	12/31/2099		
Nancy	150	2900	3/1/2009		

◀ [] ▶

Apply Coupon **Bye Bye**

The system verifies that the sale amount has reached the coupon amount. It checks it against the entire sale, not a specific item. If the customer wants to apply to an item, each item must satisfy the minimum amount.

Coupon by percentage per group.

Each coupon has a serial number and can be assigned by store and group.

In the example above

coupon 2233 can be used in all stores (indicated as !!) for group tag only.

Coupon 2234 can be used for anything anywhere

Coupon 40023 can be used only in 7766 for any item

Also there is a built in mechanism to enter a series of coupons:

Store	Coupon ID	Group	Percent
!!	2233	Tag	10
!!	2234	!!	10
!!	2235	Tag	10
	3000	Dior	15
7766	40023	!!	12

From: 50000
Number Of Cards: 500
Add Prefix:
Percent: 10
From Date: 2/13/2009
To Date: 3/31/2009
File Name (line per coupon):
OK Create Cancel

Add prefix will create a combination of a prefix with sequential number. Example, if the prefix is ABC, the first card on the above example will be ABC5000, the next one will be ABC50001 and the last ABC50499.

This type of coupon is scanned at the POS as an item. It can be scanned before the merchandise scans or after, as long as it is before finalizing the sale.
