

How to setup ups rates

Prerequisites:

Setup of UPS account with UPS and in VRP

1. Assign a shipping product in VRP, Setup 8 different UPC(s) in vrp for that product in the following order: Next Day air, 2nd Day air, Ground, Standard, 3Days Select, Next Day air saver, Next day air early AM, 2nd day air AM

Example:

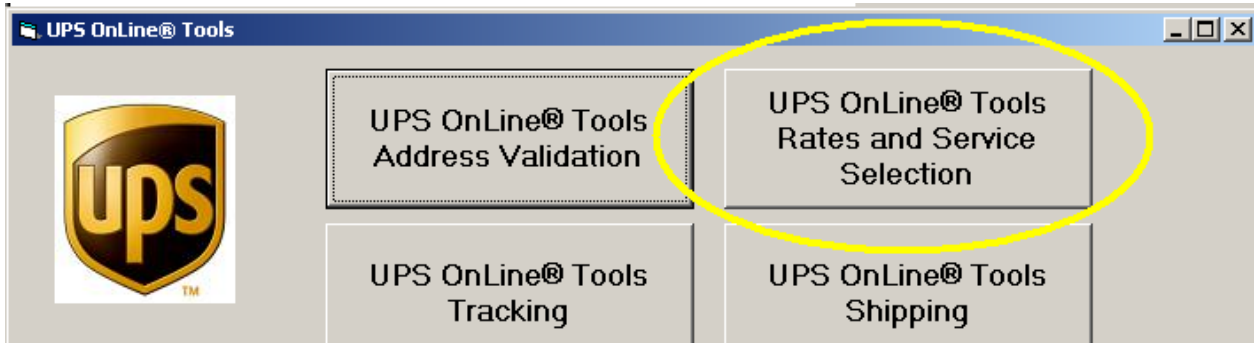

Scale	Sizes1	Sizes2	Sizes3	Sizes4	Sizes5	Sizes6	Sizes7	Sizes8	Sizes9
▶ Ship	NxtDy	2nday	Gnd	Std	3Day	Saver	Er1AM	2DyAM	
*									

2. Specify in setup what the shipping product is:

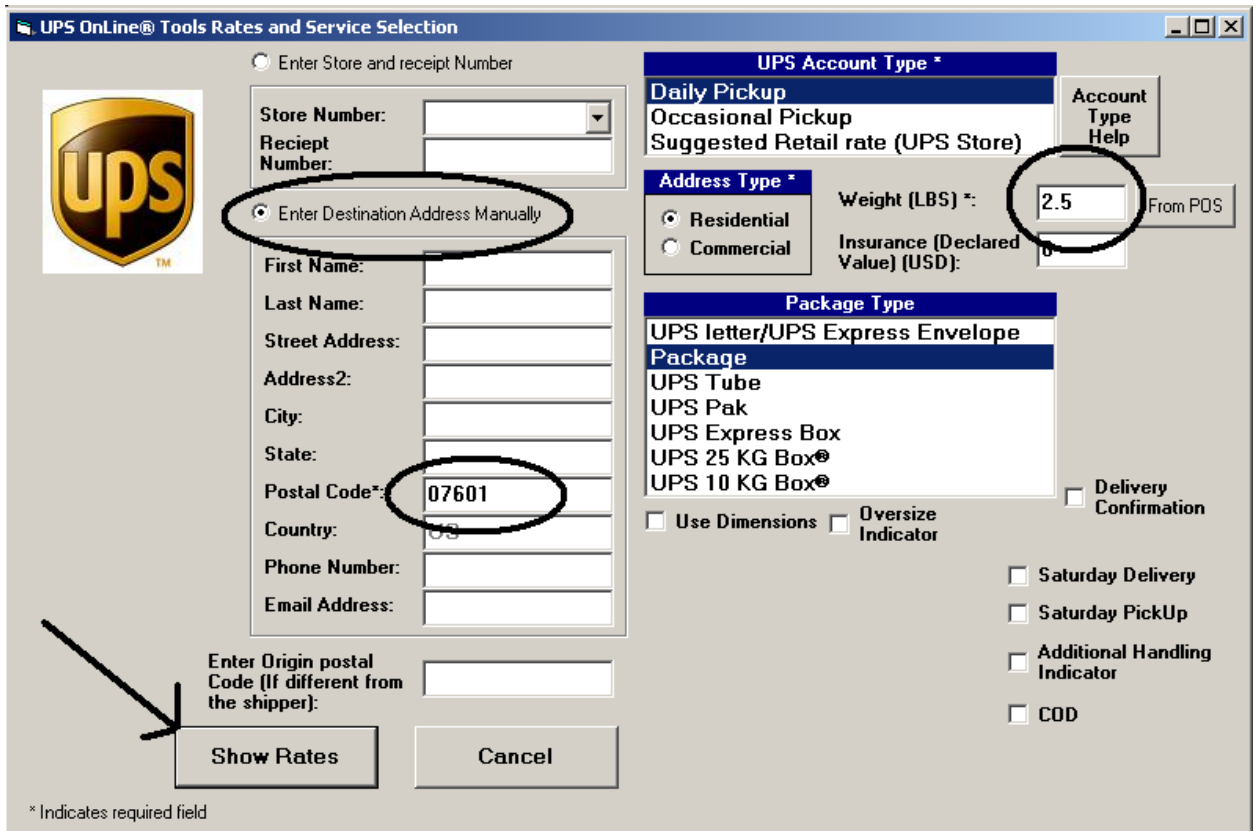

Name	Value	Description
UPSDefaultShippingPackage	1	Default Shipping Package for UPS 2-Tube, 3-Pak, 4-Express Box, 5-
▶ ShippingProduct	SH	Determines the productID used for

It's recommended also to specify the default shipping package type

Select UPS Online Tools Rates and Service Selection

Enter destination Zip Code and weight:

Click on Show Rates.

Select the desired Rate:

A dialog box titled "Rates" with a standard Windows window title bar (minimize, maximize, close buttons). The dialog contains a list of shipping options, each with a corresponding rate value in a text box and a "Select" button. The "Ground" option's "Select" button is circled in black. At the bottom of the dialog is a "Cancel" button.

Next Day Air	34.88	Select
2nd Day air	18.63	Select
Ground	8.48	Select
